Drawings

The corrected drawing was received on April 22, 2005. This drawing is not acceptable. Applicant has provided the recitation "heating means" in the drawing, but this is not acceptable notation. Element "9" was added, and this is sufficient – without the "heating means" wording. Additionally, the "G" element notations are not easily or clearly noted. In fact, the drawing, itself, contains fuzzy and unclear lines that make the entire figure difficult to see. Applicant is requested to submit FORMAL drawings, with the corrections made, so that it is clear. Examiner notes that the drawing filed on 2/28/02 is much clearer, and suitable for use as Formal Drawings – with the noted changes. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the Application is, otherwise in condition for allowance. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
